Good afternoon

I am aware that Merton Hall has been identified as a site for possible future development, and that could include making it partially or wholly residential.

Whilst I certainly agree the building needs work, I don't agree with changing its use. In an area that increasingly seems to be losing a sense of community, I believe the council should be encouraging use of centres such as these, not removing them.

If housing were to be built, I would also have concerns about traffic/parking.

Regards
