Dear David Rowe

Re: Local Implementation Plan Review

In accordance with LIP guidance please find attached the Delivery Plan for the period 2014/15 to 2016/17 and 2014/15 LIP Annual Spending Submission (Proforma A) for your approval.

The council recognises that in order to support the Mayor's transport objectives and to meet London's growth challenges we need to build supporting infrastructure to encourage a shift to more sustainable modes of transport.

This investment programme therefore places a strong emphasis on facilitating growth in Merton's town centres and improving walking and cycling across the borough. The approach is demonstrated through the council's commitment to delivering Re-discover Mitcham and Connecting Colliers Wood major projects, together with an extensive on-going programme of cycle investment.

The council will also follow the approach and lessons outlined in the Safe Streets for London Action Plan to tackle collisions in the borough, with programmes tailored to target the most vulnerable road users.

Yours sincerely

Councillor Andrew Judge
Cabinet Member for Environmental Sustainability and Regeneration
