STAGE 2 CONSULTATION

DOCUMENTARY EVIDENCE
Consultation on moving away from landfill
20th July to 16th October 2009

Consultation leaflet

>> Following last autumn’s consultation on issues and options, potential future sites for waste management facilities have been identified and policies to guide their development have been drafted.

>> Further investigation and your feedback on sites is now needed before the final selection is made. Please comment on the potential sites and draft policies using the enclosed questionnaire.
South London Waste Plan

Stage 2 Consultation

Consultation on moving away from landfill

20th July to 16th October 2009

Landfill space is running out and buried waste releases climate-changing gases. New ways of dealing with waste are needed.

Following last autumn’s consultation on issues and options, potential sites for future waste management facilities have been identified and policies to guide their development have been drafted.

Please get involved and tell us what you think about potential sites and policies.
STAGE 2 CONSULTATION

South London Waste Plan

Consultation on moving away from landfill
20th July to 16th October 2009

Landfill space is running out and buried waste releases climate-changing gases. New ways of dealing with waste are needed.

Following last autumn’s consultation on issues and options, potential sites for future waste management facilities have been identified and policies to guide their development have been drafted.

Please get involved and tell us what you think about potential sites and policies.

To get involved, find out more, register for a workshop or invite us to talk to your community group, please contact Emma Smyth by:

Phone: 020 8547 5375
Email: southlondonwasteplan@bk.kingston.gov.uk
www.croydon.gov.uk/wasteplan
www.kingston.gov.uk/wasteplan
www.merton.gov.uk/wasteplan
www.sutton.gov.uk/wasteplan

Register for a workshop near you:

Croydon 7th September, 7pm, Croydon Clocktower
Kingston 16th September, 7pm, The Guildhall, Kingston
Merton 9th September, 7pm, Civic Centre, Morden
Sutton 28th September, 7pm, Civic Offices, Sutton

A light buffet will be provided.

During the consultation period, consultation documents will be available for your comment online, at libraries and main council receptions.

This is printed on recycled paper.
The event, starting at 7pm on Monday 7 September, will allow those attending to take a close look at the draft waste plan and ask questions to those responsible for managing waste in Croydon.

Two of the big issues expected to be addressed at the session are how Croydon Council should assess planning applications for waste treatment facilities and which sites may be suitable for this type of development.

The plan has already identified 28 plots of land across south London that are potentially suitable for such developments over the next 10 years. Not all of these sites will reach the final short-list, and any building proposals will still have to go through a stringent planning application process which would consider the impact on traffic levels, noise pollution and air quality. These planning policies will also be shaped by the consultation findings - which could also possibly suggest additional sites that people think could be used for waste treatment.

Councillor Phil Thomas, cabinet member for environment and highways said: “Reducing, reusing and recycling are the first steps to avoiding landfill. We are making substantial progress in this area, but no matter how successful we are, there is always going to be some ‘residual waste’ left over. The question is, if we can’t dispose of it by burying it in the ground, what should we do with it.

“So from a planning perspective, the challenge we face is not just about finding space for more sustainable, local alternatives to landfill. There is also the important question of where should locate the recycling and composting facilities that are going to be needed in the future.”

To answer these questions, Croydon Council has joined forces with the neighbouring boroughs of Kingston, Merton and Sutton to come up with acceptable solutions.

Some of the locations identified across the region are in Croydon:

- the existing waste management site and adjoining site at Factory Lane,
- parts of the industrial area across the road from the existing site at Factory Lane,
- the council’s highways depot at Purley Oaks,
- areas within the industrial area at Purley Way, Lysander Road and Imperial Way

The consultation runs until 16 October 2009.

People can get involved in the following ways:

- attend the public workshop at Croydon Clocktower on 7 September (from 7pm),
- read the consultation documents, available online at: www.croydon.gov.uk/wasteplan,
- request a copy of the consultation document by calling 020 6547 5375 or e-mailing southlondonwasteplan@rbk.kingston.gov.uk

The final version of the plan is due to be published in February 2010 and will then be submitted to the Secretary of State for examination by an independent planning inspector.

There is pressure on local authorities to substantially reduce the amount of waste they send to landfill for two reasons:

- environmental: When ‘biodegradable waste’ (such as food, paper and cardboard) rots in landfill sites, it gives off methane, a powerful greenhouse gas which is very harmful to the environment. Space for landfill sites is also running out,
- financial: The need to dramatically reduce the amount of waste sent to landfill so that council tax does not have to be used to pay the landfill taxes and fines that central government is making on all local councils. Increases in council tax or service cuts would be the only way that the council could pay these fines.

How do you rate this information / service?

PR76

Don’t waste this opportunity to have your say

How should Kingston Council assess planning applications for waste treatment facilities and which sites in the borough are suitable for this type of development?

These are two key questions being asked by the South London Waste Plan Consultation, which continues to run until 16 October.

Residents and businesses of Kingston are reminded that a workshop will be held at Kingston Guildhall on Wednesday 16 September (from 7.00pm), giving interested parties the opportunity to have a closer look at the draft Plan, ask any questions they may have and raise any issues they feel are important.

There is pressure on local authorities to substantially reduce the amount of waste they send to landfill for two reasons:

- **Environmental:** When ‘biodegradable waste’ (such as food, paper and cardboard) rots in landfill sites, it gives off methane, a powerful greenhouse gas which is very harmful to the environment. Space for landfill sites is also running out.
- **Financial:** We need to dramatically reduce the amount of waste we send to landfill so that Council Tax does not have to be used to pay the landfill taxes and fines that Central Government is making on all local councils. Increases in Council Tax or service cuts would be the only way that the Council could pay these fines.

Councillor Simon James, Executive Member for Planning at Kingston Council, explains: “Reducing, reusing and recycling is the first step to diverting waste away from landfill. We are making substantial progress in this area, but no matter how successful we are at recycling and composting, there is always going to be some
‘residual waste’ left over for which disposal is currently the only option. The question is; if we can’t dispose of it by burying it in the ground, what can we do with it?”

“But from a planning perspective, the challenge we face is not just about finding space for more sustainable, local alternatives to landfill. There is also the important question of where we should locate the recycling and composting facilities that are going to be needed in the future if we are to continue improving our performance in this important area.”

To answer these big questions, Kingston Council has joined forces with the neighbouring boroughs of Croydon, Merton and Sutton to come up with suitably ambitious solutions.

Sites
It is clear that a new approach to treating waste in the region is required, and to make this happen, new waste treatment facilities will have to be built. The South London Waste Plan identifies plots of land that are potentially suitable for such developments over the next 10 years.

The plan currently identifies a long-list of 28 locations across the four boroughs. Not all of the 28 locations will make it on to the final short-list and any proposal for a waste management facility on a particular site will be subject to a stringent planning application process.

Four of these locations are in the Royal Borough of Kingston upon Thames:
- The existing waste management site at Villiers Road
- Land at the Junction of Kingston Road / Jubilee Way, Tolworth
- The coal depot lying adjacent to the eastern edge of Barwell Business Park
- Chessington Industrial Estate

The consultation gives residents and businesses an opportunity to comment on these sites as well as put forward their own suggestions for alternative locations that they feel should be considered.
Policies
In addition to identifying potentially suitable sites, the draft Plan also sets out a robust framework against which any specific applications to build waste treatment facilities will be assessed. Impacts on traffic levels, noise pollution and air quality are just a few of the important issues that need to be considered carefully.

Councillor James explains: "The policies contained within the Plan set out the requirements which all applications for waste management facilities must meet to get planning permission. These policies must be strong enough to ensure future waste facilities deliver the best outcomes for local people and the environment.

"One thing the Plan does make perfectly clear is that any proposed thermal treatment facility must allow for the recovery of energy from the waste and that all four boroughs are firmly against poor-performing, outdated technologies such as old-fashioned mass-burn incineration which is visually-intrusive and releases high levels of noxious emissions."

Councillor James concludes: "This is a big issue that requires bold solutions. The consultation documents are necessarily detailed. The workshop taking place on the 16 September at Kingston Guildhall is the ideal opportunity for residents and businesses to come along and have a chat with people who understand the issues and what is contained in the draft Plan inside out."

Please get involved now before the South London Waste Plan becomes policy. The consultation runs until 16 October 2009. Your views will help develop the final version of the Plan due to be published in February 2010. It will then be submitted to the Secretary of State for examination by an independent planning inspector.

How can you get involved?
• Attend the public workshop at Kingston Guildhall on 16 September (from 7pm)
• Read the consultation documents, available online at: www.kingston.gov.uk/wasteplan
• Request a copy of the consultation document by calling 020 8547 5375 or e-mailing southlondonwasteplan@rbk.kingston.gov.uk

Ends.
Merton calls for public's views on potential sites

09 July 2009

Merton, along with fellow south London councils Croydon, Kingston and Sutton, is to ask residents, local business owners, community and environmental groups for their views on possible locations for waste management sites within the boundaries of the four boroughs.

The second phase of consultation will run from 20 July through to 16 October. It builds on the first consultation held last autumn when the four councils asked residents where waste generated by residents and businesses within the boroughs should be managed in future. Responses have been taken into account in the development of the draft waste plan currently under consideration.

The councils are to invite everyone with an interest in how Merton and its partner boroughs manage their waste to complete a questionnaire and comment on the draft South London Waste Plan. The plan lists 28 possible sites across the four boroughs at which to locate future waste management facilities. The councils will also be asking about which design and planning controls should be implemented.

The questionnaire will be available at libraries and online at www.merton.gov.uk/wasteplan. Comments can also be e-mailed to southlondonwasteplan@rbk.kingston.gov.uk

Alongside the questionnaire the councils have also organised a second series of workshops open to all who want their voice heard. The workshops will give everyone the opportunity to raise their concerns, suggest possible solutions to managing waste and let the councils know their preferences as to where the waste should be managed. Local community groups can also invite officers to come to talk to them about the Waste Plan by contacting the Project Manager by email: southlondonwasteplan@rbk.kingston.gov.uk or telephone 020 8547 5375.

Public workshops will be held at the following venues:
Croydon 7 September, 7pm, Croydon Clocktower
Kingston 16 September, 7pm, Guildhall, Kingston
Merton 9 September, 7pm, Civic Centre, Morden
Sutton 28 September, 7pm, Civic Offices, Sutton
The plan is being developed in response to demands from regional and central government and the European Union for local authorities to deal with their own waste and reduce the amount they send to landfill or face being fined.

All views will be considered when developing the final version of the South London Waste Plan which will be published for further public comment in February 2010.

Merton Council's cabinet member for planning and traffic management Councillor William Brierly said: "We want to hear the views of our residents as well as businesses and environmental groups about where we should manage the rubbish we all produce.

Developing a South London Waste Plan means that local people will be able to have a say in the consideration of waste developments most appropriate for the local area. The potential locations are not a foregone conclusion so this is a real chance for people to make their voice heard about where they think the most appropriate sites are.

We would therefore encourage detailed responses from as many residents as possible. This is an objective planning process and the most powerful thing people can do is to speak up."

"We are committed to making Merton a cleaner, greener place. We all have to cut the amount of waste we generate in the first place, but we also have to manage our waste responsibly. Merton households produce over 75,000 tonnes of waste annually - almost one tonne per year for each household. Local businesses, construction sites and services produce even more and landfill space is rapidly running out. What's more, waste buried in landfill releases greenhouse gases so we cannot carry on as we are. Having new, modern facilities could both limit climate change gas emissions and reduce our reliance on landfill."

Stage 2: Sutton Press Release

Sutton calls for public’s views on potential waste management sites - 09.07.09

Sutton, along with fellow south London councils Croydon, Kingston and Merton, is asking local people to tell them what they think about possible sites for new waste management facilities within the four boroughs.

The potential sites have not been decided yet and a new consultation offers residents, local business owners, community and environmental groups a real chance to tell the councils which sites should be used.

The consultation will run from 20 July through to 16 October. It builds on a previous consultation held last autumn when the four councils asked local people where waste generated by residents and businesses within the boroughs should be managed in future.

Responses have been taken into account in the development of the draft waste plan currently under consideration.

The councils are to invite everyone with an interest in how Sutton and its partner boroughs manage their waste to complete a questionnaire and comment on the draft South London Waste Plan. The plan lists 28 potential sites across the four boroughs to locate future waste management facilities. The councils will also be asking about which design and planning controls should be implemented.

The questionnaire and documents will be available at libraries and online. Comments can also be e-mailed to southlondonwasteplan@tki.kingston.gov.uk. Residents and businesses near potential sites will receive a letter with more information.

Alongside the questionnaire the councils have also organised a second series of workshops open to all who want their voice heard. The workshops will give everyone the opportunity to find out what is being proposed and to have their say. Local community groups can also invite officers to come to talk to them about the Waste Plan by contacting the Project Manager, Emma Smyth, by email southlondonwasteplan@tki.kingston.gov.uk or telephone 020 8547 5735.

The Sutton public workshop will be held at the Sutton Civic Offices on 28 September at 7pm. Local people are asked to contact the Project Manager to reserve a place.

The plan is being developed in response to demands from the Mayor of London, central government and the European Union for local authorities to deal with their own waste and reduce the amount they send to landfill or face being fined.

All views will be considered when developing the final version of the South London Waste Plan which will be published for further public comment in February 2010.

Cllr Lyn Greenan, Sutton Council’s Executive Member for Planning, said:

“Sutton’s homes produce over 80,000 tonnes of waste a year and businesses, construction sites and services produce even more.

“Landfill space is rapidly running out and waste buried in landfill releases climate-changing gases. We need to produce less waste and also deal with it in better, modern ways and this is what the Plan aims to do.

“We want to hear the views of our residents as well as businesses and environmental groups about where we should manage waste.

“The potential sites have not been decided so this is a real chance for people to tell us about where they think the most appropriate sites are.

“We want people to give us as much information as possible to influence our decisions.”

Dear Consultee,

Stage 2 Consultation - South London Waste Plan Potential Sites and Policies: 20th July to 16th October 2009

You may be aware that Croydon, Kingston, Merton and Sutton Councils are currently seeking your views on the "South London Waste Plan." The boroughs are working together to produce the Plan in response to European, UK legislation and the Mayor’s London Plan which require more rubbish to be recycled, composted and treated in facilities close to the source of waste. Modern waste management facilities are needed to achieve this and help reduce the amount of rubbish sent to land fill.

The South London Waste Plan is a key planning document which will form part of each borough’s Local Development Framework (LDF). It will support the development of modern waste management facilities by:

- Identifying suitable sites for the possible future development of modern waste management facilities across the four boroughs.
- Identifying policies to govern and control the development of future waste facilities and help decide future planning applications in all partner boroughs.

This is the second stage of consultation on the Waste Plan. Following last autumn’s consultation on issues and options, potential future sites for waste management facilities have been identified and policies to guide their development have been drafted.

Further investigation and your comment on sites is now needed before the final selection of sites is made. Not all sites will be needed in the final list. Your views will help develop the final version of the South London Waste Plan due to be published in February 2010. It will then be submitted to the Secretary of State for examination by an independent planning inspector.
Ways to get involved

Complete a questionnaire
Two consultation documents with questionnaires have been produced:

- **Stage 2 – Potential Sites and Policy short questionnaire** which seeks your opinion on the potential sites and focus of the draft policies
- **Stage 2 – Potential Sites and Policies full questionnaire** which seeks your views on the potential sites, feedback on all sites which have been assessed as part of the Plan’s development, the full policies and how these will be monitored.

You can download the documents, or complete the questionnaire online via the following websites:

www.croydon.gov.uk/wasteplan
www.kingston.gov.uk/wasteplan
www.merton.gov.uk/wasteplan
www.sutton.gov.uk/wasteplan

Hard copies of the consultation documents are also available in Council main receptions and libraries as well as from the Project Manager.

Public workshops
Each borough will host a public workshop during the consultation period. This is your opportunity to find out more about the South London Waste Plan and discuss the key issues. Please see the details below and contact the Project Manager should you wish to register.

**Croydon**  
7th September, 7pm  
Croydon Clocktower

**Kingston**  
16th September, 7pm  
The Guildhall, Kingston

**Merton**  
9th September, 7pm  
Civic Centre, Morden

**Sutton**  
28th September, 7pm  
Civic Offices, Sutton

Invite us to come and talk to you
If you represent a local group or organisation and want to know more, please invite us to attend your meeting before 2nd October. Please contact the Project Manager early to avoid disappointment.

Many thanks,

Emma Smyth  
Waste Planning Project Manager  
South London Waste Plan

Tel: 020 8547 5375  
Email: southlondonwasteplan@rbk.kingston.gov.uk
To all residents and local businesses in the vicinity of potential sites being consulted on as part of the South London Waste Plan’s development.

Dear Resident / Local business,

Forthcoming consultation on potential sites and policies for waste management facilities in south London

From 20th July to 16th October 2009, the boroughs of Croydon, Kingston, Merton and Sutton want to hear your views about potential sites and policies for the South London Waste Plan, which the four boroughs are preparing together. By working together to jointly prepare the plan, the boroughs will reduce the costs to council tax payers.

Please take this opportunity to find out more and give us your views. A flyer containing further information about the project and explaining how you can get involved is enclosed.

This is your chance to make your voice heard and let us know where you think the most appropriate sites are and whether our plans and policies are right. We want to encourage responses from as many residents as possible. We're also asking businesses, site owners and occupiers, the waste management industry and government bodies for their views.

All UK authorities are required, by law, to identify sites for new waste management facilities. The Mayor’s London Plan gives us general guidance. Following our first consultation stage in 2006, 28 locations have been identified across the four boroughs as potentially suitable for the development of waste management facilities over the next 10 years. Planning policies to best deal with the control and regulation of these potential sites have also been drafted.
You live or work close to one or more of the potential locations (listed overleaf) which we are consulting on. We welcome your comments on their general suitability for possibly hosting a new or different waste facility in the future. We also welcome your comments on draft planning policies which will guide development of sites.

Any proposal for a waste facility will of course need to be the subject of a planning and licence application. Specific details will be required about the type and size of any new facility and how impacts e.g. traffic would be dealt with. Residents and local businesses will be notified about all new planning applications for waste facilities and you will have the opportunity to have your say.

**What happens next?**
During the consultation period, questionnaires and consultation materials will be available online at http://southlondonwasteplan.limehouse.co.uk, in your nearest library or council in an reception or in hard copy from the Project Manager, whose details appear below:

Not all sites will be needed in the final list. Your views will help develop the final version of the South London Waste Plan due to be published in February 2010. It will then be submitted to the Secretary of State for examination by an independent planning inspector.

Yours faithfully,

Emma Smyth  
Waste Planning Project Manager  
South London Waste Plan

Tel: 020 8547 6375  
Email: southlondonwasteplan@rlk.kingston.gov.uk
Planning the future for Croydon’s waste

The latest technology will be brought into play in the ongoing environmental battle we face.

A few of the methods currently being used to deal with the world’s waste:

- **Waste incineration**: High pressured steam or plasma on front or pyrolysis incinerator, which involves the use of various gases to break down waste into small particles. Can be a potential source of air pollution.

- **Plasma arc gasification**: High pressure steam or plasma to process waste using a gasification process where the waste is converted into a gas that can be used to generate electricity.

- **Mechanical-biological**: The waste is digested by bacteria and can be used to produce biogas, which can be used to generate electricity.

- **Anaerobic digestion**: Biodegradable waste is treated in an airtight tank, where the bacteria break down the waste to produce biogas. The process is energy efficient and reduces the amount of waste sent to landfill.

- **Ekteka-derived fuel**: Advanced technology that transforms waste into a high-quality fuel, which can be used in industrial processes.

- **Composting**: Waste materials are collected, composted, and then used as a soil conditioner.

Your chance to have your say

Creative, dynamic, forward-thinking and innovative - the Croydonenvironment team is seeking your views on our new waste plan.

60% the level of recycling achieved by the best performing countries.

25,000°F the temperature reached to break down pre-sorted waste.
Waste not, want not

South London councils Croydon, Kingston, Merton and Sutton will be seeking residents’ views over the next two months (20 July to 13 October) for their views on the emerging South London Waste Plan. The council will be asking residents and businesses to comment on potentially suitable sites in the borough for waste management facilities and which planning controls should be implemented.

The council has organised a series of workshops to be held at the following venues: Croydon Civic Centre, Merton Civic Centre, Kingston Civic Centre, Sutton Civic Centre.

We are keen to hear the views of our residents as well as businesses and environmental groups about where we should manage the rubbish we all produce.

Councillor William Brierley, cabinet member for planning and traffic management, says: “We are keen to hear the views of our residents as well as businesses and environmental groups about where we should manage the rubbish we all produce. There are also public opportunities to comment before the plan is submitted to central government. Further to this, there are likely to be a public inquiry before the final plan is approved. The plan is being developed in response to demands from regional and central government and the European Union for local authorities to deal with their own waste and reduce the amount they send to landfill or face being fined.”

The workshops will be held at

Service Manager: Traffic Management and Design
Planning and Transportation (The officer appears for this purpose)

SOUTH LONDON WASTE PLAN – STAGE 2 CONSULTATION

Consultation on a Joint Development Plan Document for Waste

The London Boroughs of Croydon, Kingston, Merton and Sutton are preparing a Joint Master Development Plan: Document, known as the South London Waste Plan, which sets out a framework for all major developments in the South London Region.

Following last year’s consultation on options and policies, the four boroughs have now produced a strategy for future waste management facilities. The proposed waste strategy provides for new waste incineration plants in Sutton and Croydon, in addition to the new incineration plant at Chiswick, and recycling centres at Sydenham and Morden.

The Joint Development Plan Document for Waste is now ready for consultation in accordance with the requirements of the Planning Act 2008.

The consultation period will commence on 10th October 2008 and end on 10th December 2008. Comments and objections can be made in writing via the following addresses:

Croydon Borough Council: Planning Department, Civic Centre, Civic Parade, New Addington Hill, Lower Addington, Kent SM3 9SF

Kingston Borough Council: Planning Department, Civic Offices, Civic Parade, New Malden, KT3 5EP

Merton Borough Council: Planning Department, Civic Offices, Chestnut Drive, Morden, SM4 6JH

Sutton Borough Council: Planning Department, Civic Offices, Civic Parade, Parkside, Sutton, SM1 1JH

Please send any correspondence regarding the South London Waste Plan to: M.T. Mansfield, Joint Development Manager, Planning and Development, Civic Offices, Civic Parade, New Malden, KT3 5EP.

Stage 2: Merton Public Notice

London Borough of Merton Public Notices

South London Waste Plan – Stage 2 Consultation

Consultation on a Joint Development Plan Document for Waste

The London Borough of Croydon, Lambeth, Merton and Sutton are undertaking a Joint Development Plan Consultation for Waste. This consultation will take place through a series of Local Development Frameworks (LDFs) and a Strategic Plan for Waste. The LDFs will be held in parallel with the Strategic Plan to allow for a more comprehensive approach to waste management and to ensure a consistent approach across the four boroughs.

The consultation will cover the following issues:

- The overall approach to waste management in the boroughs
- The strategy for waste reduction, recycling, and recovery
- The proposed sites for waste facilities

The consultation will run from 22nd July to 15th September 2010.

Schedule 1

Visiting Distribution: Opening at any time

At the following addresses:

- 10-12 Market Street
- 1-3 London Road
- 4-6 Burroughs Road
- 7-11 Norbury Road
- 12-14 London Road

Schedule 2

North London Waste Centre opening Monday to Friday between 8am and 8pm

At the following addresses:

- London Road
- South Norwood
- West Norwood

Schedule 3

Open Day: Saturday, 5th September, 2010

At the Waste Centre.

Contact details:

- London Borough of Merton, Environment and Regeneration, Civic Centre, Morden Road, Morden, Surrey SM4 6DX
- Tel: 020 8274 6981
- Email: environment@mboro.gov.uk

JOBS & Careers

Ocadia

Delivery drivers wanted

Ocadia is a leading supplier of quality products and services to the healthcare industry. We are currently seeking part-time delivery drivers to join our team in the North London area.

- Hours: 8am to 4pm
- Days: Monday to Friday
- Experience and driving license required
- Must be able to lift up to 25kg

Please contact our Recruitment Department on 020 8329 9244 or email jobs@ocadia.co.uk

KIDS FIRST PARENTS FORUM

CO-ORDINATOR

We are looking for a part-time (15 hours per week) coordinator to lead the Kids First Parent's Forum.

The forum provides a platform for parents to share ideas, concerns, and solutions to improve the services offered by the council. The coordinator will be responsible for:

- Organising and facilitating meetings
- Preparing agendas and minutes
- Liaising with council departments

Experience in a similar role is desirable.

Closing date: 8th August 2010

Christ Church

Alexander House Care Home, Wimbledon

Applications are invited for the post of Deputy Manager

To help run and manage this pleasant and highly regarded Christian residential home.

The successful candidate will have a commitment to the Christian faith, a high level of care experience, and the ability to work well as part of a team.

Closing Date: 27th July 2010
Stage 2: Sutton Public Notice

Public Notice

NOTICE OF APPLICATION FOR MAJOR DEVELOPMENT

ARTICLE 128

In accordance with the above notice, the Council are hereby giving notice that application(s) have been made to the Epsom and Ewell Borough Council for permission to carry out the following proposals:

09/0395/LDA Barn House, 164 Church Street, Ewell
Repair, refurbish and re-clad roof.

09/0343/ADV Card Wanehouse, 81 High Street, Epsom
Replacement of fascia signs with no illumination.

09/0344/FUL T K Mars, 108-110 High Street, Epsom
Removal and re-erection of 2 pairs of manual opening doors and replace with 1 new powder coated aluminium automatic sliding door in existing opening.

09/0355/TPO Pantiles, 1A Longdown Road, Epsom
Crown lifting of two lines within 0.50 TPO20 situated in the garden fronting Alexandra Road.

09/0356/CAT Epsom Ballit House, 26 South Street, Epsom
Removal of 24 Sycamore and 1 Elder situated within the conservation area at the rear of the property.

09/0356/ADV B J Kellys Chemist, 28 West House Parade, Epsom Road
New externally illuminated fascia signs, externally illuminated projecting sign and replacement awnings.

09/0375/TPO 1 Barrow Hill Close, Warburton Park, Surrey
Felling of Giant Redwood within L1 WRI situated in the front garden. Exempt works as the trees were severely damaged by a lightning strike on 16/07/2009.

The applications listed below are householder applications, in the event of an appeal against a refusal of planning permission, which is to be dealt with on the basis of representations in writing, any representations made about the application will be sent to the Secretary of State, and there will be no further opportunity to comment at appeal stage.

09/0351/FUL 45 Burgh Heath Road, Epsom, Surrey

09/0379/FUL 3 Lane End, Epsom, Surrey
Replacement if existing timber garage to be removed.

09/0304/FUL 3 West Hill, Epsom, Surrey
To replace existing roof with new roof, repair and re-cover chimney stacks, replace existing gutters, fascias and soffits.

09/0346/FUL 10A Church Street, Ewell, Surrey
New wooden gates to courtyard and insertion of new windows in flank wall of cellar.

09/0366/FUL 1 Wrythe Road, Epsom, Surrey
Two-storied flank extension.

A copy of these applications and accompanying drawings will be available for inspection by the public during normal office hours at the Town Hall, Epsom and Ewell Town Council, Epsom, KT18 5SR, to arrive within 21 days from the date of publication of this advertisement.

The Council is required by the Planning and Compulsory Purchase Act 2004 to record all applications and to make them available to the public. To assist the Council in complying with these requirements, it is advisable to complete the attached form and return it with the application documentation.

Information about the procedure for submitting a response to a planning application is available from the Council’s Planning Department on 020 8329 2444.

The Town Planning Committee will consider any representations received on the basis of the information the Council is required to record and make available to the public. The Council’s decision will be published on the Council’s website at www.evel.ws.uk.

Please note that the Council is not bound by any such representations.

South London Waste Plan

Consultation on Additional Sites
8 February to 22 March 2010

Landfill space is running out and buried waste releases climate-changing gases. New ways of dealing with waste are needed.

There is an urgent need to identify sites that are suitable for new waste management facilities.

Last year, we asked residents to comment on a shortlist of 28 sites located across the boroughs of Croydon, Kingston, Merton and Sutton that are considered potentially suitable for waste management facilities to be built on in the future.

During that consultation, an additional eight sites were put forward by respondents as being worthy of consideration. We are now inviting comments on the suitability of these eight sites for waste management purposes.

Please get involved and tell us what you think.

Questionnaires and consultation materials are available online at: http://southlondonwasteplan.limehouse.co.uk

Alternatively you can view a copy of the consultation document in your local library, council main reception or you can arrange for a copy to be sent to you by contacting Emma Smyth:

Tel: 020 8547 5375

PR173

Additional sites for waste management – have your say

The boroughs of Croydon, Kingston, Merton and Sutton have launched a six-week consultation period giving residents an opportunity to comment on the suitability of eight sites for waste management purposes.

The sites under consideration are:

- Land west of Hawkhurst Road, Croydon
- Open area of land adjacent to Chessington Garden Centre, Kingston
- Land to the south of Silverglade Business Park, Kingston
- Land at the Hogsmill Valley, Kingston
- Wimbledon Greyhound Stadium, Merton
- Former gravel extraction works sites (the old Cemex site), Beddington Farmlands, Sutton
- Wandie Valley Trading Estate, Hackbridge, Sutton
- Land to the north of Jessop’s Way, Beddington, Sutton

These eight sites are ‘additional sites’ that were put forward by residents, land owners and waste operators during a previous stage of consultation which took place between July and October 2009.

The suitability of these eight additional sites has been assessed using a set of robust criteria that takes into consideration issues such as flood risk, traffic impacts and visual intrusion and gives a score to each site. All eight sites scored relatively poorly, when compared with the 28 sites that were shortlisted in the previous stage of the consultation in 2009. This indicates that, from a
planning perspective, there would be obstacles to them being used for waste management purposes.

Residents and other interested parties are now being asked for their views on the assessments of these eight sites and their suitability for waste management purposes.

Councillor Simon James, Executive Member for Planning and Regeneration at Kingston Council, said: “The sites have scored relatively poorly against the assessment criteria and so are clearly not sites we would seek to include in the Waste Plan. But it is still important that we seek the views of residents and other interested parties to make sure that we have investigated all of the options fully – just like we did with the 112 sites that scored poorly in the previous consultation stage. It is critically important that the South London Waste Plan is robust and reflects the views of local people, so we do not want to leave a stone unturned.”

The consultation will run from 8 February until 22 March. Questionnaires and consultation materials are available online at: http://southlondonwasteplan.limehouse.co.uk
Alternatively, the consultation documents are available in libraries, council main receptions or by contacting Emma Smyth, Waste Planning Project Manager:
Tel: 020 8547 5375
Email: southlondonwasteplan@rbk.kingston.gov.uk

To accommodate this extra phase of consultation, the final version of the South London Waste Plan is now due to be published in the autumn of 2010. It will then be submitted to the Secretary of State for examination by an independent planning inspector.

Ends.
Notes for editors:

**The South London Waste Plan**

- How should planning applications for waste treatment facilities be assessed in the future and which sites in the region are suitable for this type of development? These are two key questions that will be answered by the South London Waste Plan, an important planning document that is being prepared jointly by the four boroughs of Croydon, Kingston, Merton and Sutton.

- The Plan aims to improve certainty about waste development. Currently, there are few local planning policies which can be used to assess applications for waste management facilities. The South London Waste Plan will improve this situation: it will contain a number of robust policies against which all future planning applications for waste management facilities will be assessed. These policies will ensure the best outcomes for local people and the environment. It will also identify sites that are considered suitable for waste management purposes, providing the waste industry with clear direction in choosing appropriate locations.

- It is a requirement of all planning authorities to identify sites within their boundaries that could be used for waste treatment. EU and UK legislation (as well as the Mayor of London’s London Plan) require increasing amounts of this waste to be sorted and processed in facilities closer to where it was generated.

- To achieve this locally, new waste management facilities will be needed. An estimated 20 hectares (49 acres) of land will be needed across the four boroughs to accommodate the new waste facilities that are going to be required between now and 2021.

- The South London Waste Plan is being developed in close consultation with residents, land owners, waste operators and government departments:

<table>
<thead>
<tr>
<th>Consultation phase</th>
<th>Date</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stage 1 ‘Issues and options’</td>
<td>September – October 2008</td>
<td>To define areas of search for compiling a ‘long list’ of potentially suitable sites. Also sought feedback on issues which needed to be taken into consideration when assessing a site’s suitability.</td>
</tr>
<tr>
<td>Stage 2 ‘Potential sites and policies’</td>
<td>Summer – Autumn 2009</td>
<td>To seek views on a ‘shortlist’ of 28 sites that were considered potentially suitably (whittled down from a long list of 140 sites). Also presented for comment draft policies against which planning applications for future waste management facilities would be assessed.</td>
</tr>
<tr>
<td>Stage 2a ‘Additional sites’</td>
<td>February – March 2010</td>
<td>To seek views on the suitability of eight additional sites put forward for consideration during the Stage 2 consultation. These sites all scored relatively poorly in their assessments and would not have made it on to the shortlist considered in Stage 2 of the consultation.</td>
</tr>
</tbody>
</table>

- Feedback from all stages of consultation will play a central role in drafting the final version of the South London Waste Plan, which is due to be published in the autumn of 2010. It will then be submitted to the Secretary of State for examination by an independent planning inspector, including an ‘Examination in Public’ in the spring of 2011. The four Councils are due to formally adopt the Plan in the winter of 2011.
The development of the South London Waste Plan is running in tandem with the procurement of new waste treatment facilities through the South London Waste Partnership (see below for details). These are two entirely separate processes. However, any future planning applications for waste treatment facilities that are submitted as a result of the South London Waste Partnership’s procurement work will be considered against the new policies contained within the South London Waste Plan, once it has been finalised.

The South London Waste Partnership

- The South London Waste Partnership (SLWP) is a group of four London Authorities (Croydon, Kingston, Merton and Sutton) that are working together to provide improved waste management services across the area.

- This is an unusual arrangement within the UK as it comprises four unitary boroughs who have voluntarily created formal arrangements for the procurement and management of contracts to treat and dispose of waste.

- The current focus of the SLWP’s activities is to divert waste away from landfill. Landfill tax is increasing at a rate of £8 per tonne per year, currently standing at £40 per tonne. These escalating costs are making landfill not only environmentally unsustainable but financially prohibitive as well.

- Reducing, reusing and recycling remains the best way of diverting waste away from landfill. With the help and commitment of residents, the four partner boroughs are all making substantial progress in this area – the SLWP procures and manages contracts for improved local recycling and composting facilities to ensure that this progress continues.

- The SLWP has already awarded three separate contracts:
  - **Contract 1** - Transfer, transportation and landfill disposal: awarded to Viridor in 2008
  - **Contract 2** - Management of seven Household Reuse and Recycling Centres located across the four boroughs: awarded to EWC in 2008

- The SLWP is now procuring (with the support of £225m Defra PFI funding) further infrastructure to treat the remaining 200,000 tonnes of residual waste per year. This is waste that would otherwise have been destined for landfill.

- The procurement process is currently ongoing with the contract due to be awarded in March 2011. The resulting treatment facility (or facilities) is due to become operational in 2014/15.

- The SLWP must remain technology-neutral during the tendering process. But the Partnership has made it clear that if any bidder proposes to use thermal treatment, they must allow for the recovery of energy from waste and seek to provide efficient heat-off-take for local use. All four boroughs are firmly against poor-performing, outdated technologies such as old-fashioned mass-burn incineration, which are visually intrusive and release high levels of noxious emissions.
Consultation on potential sites for waste management facilities in South London

8 February - 22 March 2010

Dear Local Development Framework (LDF) Consultee,

The boroughs of Croydon, Kingston, Merton and Sutton are now seeking comments in response to the 'Stage 2a: Additional Sites Consultation' for the South London Waste Plan. Details on how to obtain consultation documents are found overleaf.

Last summer we wrote to all residents and other parties interested in the development of each borough's LDF, to let you know about a major planning consultation centred around a draft of the South London Waste Plan – an important planning document being jointly prepared by Croydon, Kingston, Merton and Sutton councils.

The consultation, which ran from 20 July until 16 October 2009, gave people an opportunity to have their say about two key issues:

- **Sites** - respondents were asked for their views on a 'shortlist' of 28 sites across the four boroughs that were considered potentially suitable for waste management facilities. The sites that appeared on this shortlist had been whittled down from an original 'long list' of 140 sites, which were also published.

- **Policies** - respondents could also comment on a draft set of policies against which planning applications for waste management facilities will be assessed in the future.

In addition to asking for comments on the suitability of the draft policies and shortlisted sites, respondents also had the opportunity to put forward sites that had not been previously considered (i.e. were not included in the original 'long list' of 140 sites). Eight new sites were suggested by residents, landowners and waste operators which have been considered.
The eight sites now the subject of the ‘Stage 2a Additional Sites Consultation’ are:
- Land west of Hawkhurst Road, Croydon
- Open area of land adjacent to Chessington Garden Centre, Kingston
- Land to the south of Silverglade Business Park, Kingston
- Land at the Hogsmill Valley, Kingston
- Wimbledon Greyhound Stadium, Merton
- Former gravel extraction works sites (the old Cemex site), Beddington Farmlands, Sutton
- Wandle Valley Trading Estate, Hackbridge, Sutton
- Land to the north of Jessop’s Way, Beddington, Sutton

The suitability of these eight additional sites has been assessed using the same set of criteria that was employed to whittle the 140 sites down to 28 prior to last year’s consultation. All eight additional sites scored relatively poorly and would not have made it on to the ‘short list’ of 28 sites in the previous stage of consultation. The poor scores for these eight sites indicates that a number of obstacles have been identified which would constrain their development for waste management purposes.

A further six-week period of public consultation is now being held to ensure that residents and other stakeholders have an opportunity to comment on the assessment planning officers have undertaken of these additional eight sites.

This stage of the consultation (Stage 2a: ‘Additional Sites Consultation’) will run between 8 February – 22 March 2010. Your views will help develop the final version of the South London Waste Plan due to be published in October/November 2010. It will then be submitted to the Secretary of State for examination by an independent planning inspector.

Questionnaires and consultation materials are available online at: http://southlondonwasteplan.limehouse.co.uk where you can also view a full list of all eight additional potential sites that were put forward during Stage 2 of the consultation.

Alternatively, you can view a copy of the consultation document in your nearest library or council main reception or request a copy from the Waste Planning Project Manager, whose contact details appear below.

If you have any questions, please get in touch using the contact details below.

Yours faithfully,

Emma Smyth
Waste Planning Project Manager
South London Waste Plan
Consultation on potential sites for waste management facilities in South London

8 February - 22 March 2010

Dear Resident / Local Business,

During the summer and autumn of 2009, a major public consultation took place giving people an opportunity to have their say about a ‘shortlist’ of 28 sites that were considered potentially suitable for waste management facilities. The sites that appeared on this shortlist had been whittled down from an original ‘long list’ of 140 sites.

In addition to asking for comments on the suitability of sites and policies, respondents also had the opportunity to put forward sites that had not been previously considered. Eight new sites were suggested by residents, landowners and waste operators for consideration. I am writing to you because one of these sites is located close to where you live or work.

We have assessed the suitability of these eight additional sites using the same set of criteria employed to identify the 28 ‘short listed’ sites in last year’s consultation. All eight sites scored relatively poorly and would not have made it on to the ‘short list’ of 28 sites in the previous stage of consultation. The poor scores for these eight sites indicates that a number of obstacles have been identified which would constrain their development for waste management purposes.

Four of the eight sites (listed overleaf) have been put forward by the land owner and a waste operators, both of whom have shown interest in developing the land for waste purposes.
Stage 2a: Neighbour Notification (Page 2 of 3)

Sites supported by both the land owner and a waste operator:
1. Land at the Hogsmill Sewage Works, Kingston
2. Go Kart Track site off Beddington Lane, Sutton
3. Wandle Valley Trading Estate, Hackbridge, Sutton
4. Former gravel extraction works site (the old Cemex site), Beddington Farmlands, Sutton

A map locating these four sites can be found on the back of this letter

Residents and other interested parties are being asked for their views on the suitability of these additional sites for waste management purposes. Your views are particularly important as you live or work close to one of the sites.

Background
Local authorities are required to reduce the amount of waste they send to landfill and increase the amount of waste being recycled or composted. This waste should also be processed in facilities closer to where it was generated. To achieve this in South London, new waste management facilities will be needed.

Where these facilities are built and how planning applications for them should be assessed are two key questions that will be answered by the South London Waste Plan – an important planning document that is being jointly prepared by Croydon, Kingston, Merton and Sutton Councils.

The South London Waste Plan will identify sites that are considered suitable for waste management facilities. Of course, any specific proposals for a waste facility would also be the subject of a separate planning and licence application, giving local residents and business owners further opportunities to have their say.

Previous consultation stages
Two stages of consultation have already taken place in developing the South London Waste Plan:

- **Stage 1: ‘Issues and Options’** – This initial stage of consultation is now closed. It took place between September and October 2008. We asked for feedback on the suggested criteria that the four councils would use to compile a ‘long list’ of potentially suitable sites for waste management facilities in accordance with the Mayor of London’s London Plan.

  Following this initial stage of consultation, the four councils carried out a search of sites in their respective boroughs. The result was a ‘long list’ of 140 sites. The potential suitability of these sites for waste management purposes was then assessed. The assessment looked at issues such as site configuration, proximity to residential areas, traffic impacts and visual intrusion and gave a score to each site. The 28 sites that achieved the highest scores were placed on a ‘shortlist’ that were considered in Stage 2.

- **Stage 2: ‘Potential Sites and Policies’** – This stage of consultation is now closed. It took place between July and October 2009. It gave residents and other interested
Stage 2a: Neighbour Notification (Page 3 of 3)

parties the opportunity to review and comment on the 28 'shortlisted' sites as well as proposed planning policies. The remaining sites that did not make it on to the shortlist – because they were considered to have obstacles to their development – were also published at the time online and in an accompanying technical report.

Respondents were also given the opportunity to suggest sites that had not been previously considered (i.e. were not included in the original 'long list' of 140 sites).

What happens next?
Your views will help develop the final version of the South London Waste Plan due to be published in October/November 2010. It will then be submitted to the Secretary of State for examination by an independent planning inspector.

This stage of the consultation (Stage 2a: ‘Additional Sites Consultation’) will run from 8 February until midnight on 22 March.

Questionnaires and consultation materials will be available online at:
http://southlondonwasteplan.limehouse.co.uk where you can also view a full list of all eight additional potential sites that were put forward during Stage 2 of the consultation.

Alternatively, you can view a copy of the consultation document in your nearest library or council main reception or request a copy from the Waste Planning Project Manager, whose contact details appear below.

If you have any questions, please get in touch using the contact details below.

Yours faithfully,

Emma Smyth
Waste Planning Project Manager
South London Waste Plan

Email: southlondonwasteplan@rbk.kingston.gov.uk
Update on the South London Waste Plan

Dear Respondent,

Thank you for taking part in our consultation last year on potential sites and policies for the South London Waste Plan. We received around 1,300 responses from residents, businesses, the waste management industry and government bodies. Planning officers were also invited to attend 35 meetings with interested residents and businesses across the four partner boroughs of Croydon, Kingston, Merton and Sutton.

As you will recall, the consultation centred round a draft of the South London Waste Plan - a planning document being jointly prepared by Croydon, Kingston, Merton and Sutton Councils. Once approved, this Plan will identify sites across the four boroughs that are suitable for the development of waste treatment facilities and will establish a set of robust policies against which planning applications for future facilities are assessed.

The findings of this consultation are now available and can be viewed at http://southlondonwasteplan.limehouse.co.uk, in libraries and Council main receptions. The wealth of feedback received during the consultation will influence the recommendations made in the final draft of the South London Waste Plan.

The consultation asked respondents to consider and comment on a ‘shortlist’ of 26 sites across the four boroughs that are considered potentially suitable for developing new and/or enhanced waste management facilities. The sites that appeared on this shortlist had been whittled down from an original ‘long list’ of 140 sites. The sites that did not make it on to the shortlist – because they were considered to have obstacles to their development - were also published at the time, online, and in an accompanying technical report. Residents and other interested parties were also invited to comment on these.

In addition to commenting on the suitability of the shortlisted and long listed sites, the consultation gave respondents the opportunity to put forward sites that had not been previously considered. Eight new sites were suggested by residents, landowners and waste operators which have been considered.
Stage 2a: Previous Respondent Letter (Page 2 of 2)

We have assessed the suitability of these eight additional sites for waste management purposes. All eight sites scored relatively poorly and would not have made it onto the shortlist of sites considered in the previous stage of consultation in which you took part. These poor scores indicate that from a planning perspective, there would be obstacles to them being used for waste management purposes (see the table overleaf for a summary).

Residents and other interested parties are now being asked for their views on the site assessment and the possible use of these additional sites for waste management related purposes. As you took part in the previous phase of the consultation, we would be interested to hear your views on these additional sites.

We welcome your comments on the eight sites identified in this Stage 2a consultation document. We are not asking for comments on sites identified in earlier consultations, nor inviting people to identify any further sites.

**Consultation documents will be available for six weeks from 8 February until midnight on 22 March at the following locations:**
- [http://southlondonwasteplan.limehouse.co.uk](http://southlondonwasteplan.limehouse.co.uk)
- All libraries in Croydon, Kingston, Merton and Sutton (please ask at the reception)
- All main council receptions in Croydon, Kingston, Merton and Sutton (please ask at the reception)

Alternatively, please contact the Waste Planning Project Manager using the contact details below for a copy to be posted to you.

**What happens next?**
To accommodate this extra phase of consultation, the final version of the South London Waste Plan is now due to be published in October / November 2010. It will contain planning policies for assessing future waste management applications and the list of suitable sites which could be used for such proposals. It will then be submitted to the Secretary of State for examination by an independent planning inspector.

**Please take this opportunity to find out more and give us your views.** If you have any questions, please get in touch using the contact details below.

Yours faithfully,

Emma Smyth
Waste Planning Project Manager

Rising stars honoured at awards evening

Outstanding young achievers from Merton’s secondary schools, academies, specialist schools and Merton College were honoured with special awards during an awards ceremony in November as part of the England Tour, South Asian Arts Festival.

Pupils from across the borough were nominated by their teachers for these special awards to individual achievements and successes.

As well as recognising academic excellence, the awards highlighted students who had excelled in other areas such as performing arts and, in particular, praised those young people who have made a significant contribution to school life and given support to their fellow pupils.

Richard Avis, Head of Arts at Langley Park High School and Sixth Form Academy, provided music for the event, which was attended by local dignitaries, government and business leaders, along with nominated students and their guests.

Councillor Debbie Denman, Cabinet Member for Children’s Services said: “Our school and college pupils have made outstanding achievements, including GCSEs, A levels and other qualifications in the arts and sciences.

“My congratulations to each and every one of the winners and I wish them well in their future careers.”

Have your say on new potential waste sites

A major consultation is being planned by planners and local development teams in future waste management plans in the borough of Croydon, Epsom and Wimbledon.

The council will consult on the introduction of new recycling and waste plans, including the potential for new recycling and waste management plans.

To express your views on the waste management plans, please visit the Council’s website at www.merton.gov.uk/environment.

Swap to Fairtrade for 2010

As Merton is officially a Fairtrade borough, the borough is encouraging residents to switch to Fairtrade products over the next year and beyond.

The council is urging residents to get involved and join the Big Swap during National Fair Trade Week, which takes place from 7 to 13 February.

The council is encouraging residents to swap their usual coffee for Fairtrade coffee and their usual chocolate for Fairtrade chocolate.

Merton 6th forms on track

It’s all on track for the introduction of 6th form education for Merton’s secondary schools, with the borough’s first sixth form centres due to open in the autumn of this year.

The 6th form centres are being set up in co-operation with local colleges and will provide an extended learning environment for students.

To find out more, please visit www.merton.gov.uk/6thforms.
PLANNING (LISTED BUILDINGS AND CONSERVATION AREAS) ACT 1990
UPPER NORWOOD TRIANGLE CONSERVATION AREA

The Council have received an application for planning permission to carry out the following development within the above conservation area in which their plans would affect the character or appearance of the area.

Application Number: 105232/05

Proposed development:
Office of up to 2 floors

Location of site:
Upper Norwood, London, SE23 3DG

Members of the public may inspect copies of the application, along with any other documents submitted with it by visiting our web site www.croydon.gov.uk/planning and selecting ‘Planning Applications Search’ or by visiting the Planning Reception desk on the ground floor of Tanners House, Park Lane, Croydon CR9 2NY (please ask public reception for assistance).

If you wish to make any comments on these applications, please respond to the Council using the reference number stated above. Please note that comments from the site may not be accessible.

TOWN AND COUNTRY PLANNING ACT 1990

The Town and Country Planning Department (General Development Procedure) Order 1995

Planning (Listed Buildings and Conservation Areas) Act 1990

SOUTH LONDON WASTE PLAN – STAGE 2A CONSULTATION

Consultation on Additional Sites

The London Borough of Croydon, together with Sutton and Bromley are preparing a Joint Waste Development Plan Document. Known as the South London Waste Plan, this will form part of each borough’s Local Development Framework.

In light of the Joint Waste Development Plan Document, the Council are consulting on a number of sites for strategic development, each capable of accommodating either a new waste treatment facility or a significant expansion of existing waste treatment facilities.

The proposals are summarised in the table below:

<table>
<thead>
<tr>
<th>Proposed Site</th>
<th>Development Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tanners House</td>
<td>New Waste Treatment Facility</td>
</tr>
<tr>
<td>Sutton Ridges</td>
<td>New Waste Treatment Facility</td>
</tr>
<tr>
<td>South Croydon</td>
<td>New Waste Treatment Facility</td>
</tr>
</tbody>
</table>

The Council are consulting on these proposals in accordance with the Council’s Local Development Framework and Part 2 of the National Planning Policy Framework.

Public inspection will be available on display at the following locations until 10th March 2020:

- Tanners House, Park Lane, Croydon CR9 2NY
- Sutton Ridges, Sutton Lane, Sutton SM2 7LH
- South Croydon, South Croydon, CR2 8EF

Comments on the proposals should be submitted by 10th March 2020 to the Council’s Planning and Regulatory Services Department at planning@croydon.gov.uk.

In order to ensure the effective delivery of the Waste Development Plan, the Council is seeking comments from all members of the public and stakeholders who are likely to be affected by these proposals.

If you have any questions or require further information, please contact the Planning Department at 020 8264 6600 or via email at planning@croydon.gov.uk.

The Executive Director of Planning and Regulatory Services will consider all submissions made and make a decision on the proposals.

Date: 14th February 2020

SOUTH LONDON WASTE PLAN - STAGE 2a CONSULTATION
Consultation on Additional Sites

The London Borough of Croydon, Kingston, Merton and Sutton are preparing a Joint Waste Development Plan Document, known as the South London Waste Plan. This will form part of each borough’s Local Development Framework.

Last year, we asked residents to comment on 28 potential sites for future waste management purposes and draft policies to guide their development. During this consultation, a number of sites were put forward by respondents as being worthy of consideration. The sites have been assessed using the site assessment process applied at the previous consultation stage. All of the eight additional sites scored relatively highly and would not have made it to the shortlist of sites had they been tested through the previous stage of consultation. The purpose of this consultation is to extend the range of sites that may be developed for waste management purposes.

A further six-week period of public consultation from 5 February to 25 March is now being held to ensure that residents and other stakeholders have an opportunity to comment on the assessment planning officers have undertaken of these additional sites. Please note that this consultation period cannot be extended, nor are we seeking comments on sites identified at previous consultation stages.

Documents and questionnaires can be found at http://southlondonwasteplan.london.gov.uk or local libraries and council main receptions. Alternatively, you can arrange for a copy to be sent to you by contacting Emma Smyth at 020 8394 8795 or southlondonwasteplan@london.gov.uk.

Please send any correspondence regarding the South London Waste Plan to the Project Manager, South London Waste Plan, The Royal Borough of Kingston Upon Thames, High Street, Kingston Upon Thames, KT1 1SD or via e-mail above.

Responses will be made public and a summary of the consultation findings will be made available on the website in the months following consultation.
SOUTH LONDON WASTE PLAN - STAGE 3A CONSULTATION CONSIDERATION ON ADDITIONAL SITES

The London Borough of Croydon, Kingston, Merton and Sutton are preparing a Joint Waste Development Plan Document, known as the South London Waste Plan. This will form part of each borough's Local Development Framework.

Last year, we asked residents to comment on 20 potential sites for future waste management facilities and draft policies for their development. During that consultation, an additional eight sites were put forward by respondents as being worthy of consideration. These were added to the list of sites that were consultated upon, and the screening process applied at the previous consultation stage. All eight of these sites were put to the public for consultation last October, and no have not made it on to the shortlist of 28 potential sites identified in the previous stage of consultation. The seven locations for these eight sites indicates that a number of obstacles have been identified which would contain their development for waste management purposes.

A further six-week period of public consultation from 3 February to 22 March is now being held to ensure that residents and other stakeholders have an opportunity to comment on the seven remaining planning officers here undertaking of these additional eight sites. Please note that this consultation period cannot be extended, nor are we seeking comments on sites identified at previous consultation stages.

Documents and questionnaires can be found at http://www.southlondonwasteplan.bromley.gov.uk. In local libraries and council main offices. Alternatively you can arrange for a copy to be sent to you by contacting Emms Smyth on 020 864 5075 or southlondonwasteplan@bromley.gov.uk.

Please send any correspondence regarding the South London Waste Plan to the Project Manager, South London Waste Plan, The Royal Borough of Kingston Upon Thames, High Street, Kingston Upon Thames, KT1 1EU, or via the e-mail above.

Responses will be made public and a summary of the consultation findings will be made available on the website in the form of the following consultation.
