

From: Somerville. M & G

Dear Sir

We have heard via a friend that there are proposals to build on Kenilworth Green. We are surprised that we have had to learn about this proposal so circuitously – as residents of Wimbledon Park ward and living close to the site we feel we should have been told about this proposal directly as it directly affects us.

We oppose the suggestion. The park is a welcome spot of a greenery sandwiched between the railway and high density housing.

In a recent planning application developers were asked to provide S106 money to provide amenity space yet in this instance the Council is suggesting taking away this amenity space. Every green space in the borough should be protected
