With reference to the Colliers Wood potential sites and draft policies and map, Jan 2013 documents, please note our comments below regarding these proposals.

Proposal 78 (191 - 193) Western Road

So that there are no overlooking issues, development should not be more than 2 stories high and blocks of flats would most definitely not be wanted - they would not only increase the congestion issues in Western Road which already exist, but also create the overlooking issues and bring an increase noise pollution due to the density.

We would appreciate any development at the end of the gardens in Church Road is applied the sympathy of the local residents, some of whom including us who have lived here many many years.

There are currently no issues in connection with overlooking or noise due to the sites present use even though it it not very pretty!

The land (fully shaded in grey) sandwiched between the gardens of the houses on Church Road and Western Road have been home to a family of properties for many years. If this area of land becomes a green open space the issues of overlooking and noise would be kept to a minimum whilst preserving a wildlife habitat and improving the local area.
