Re: Sites 41: Kingston Road opp. Lower Downs

This concerns the Development planned for an apartment block to be built on Kingston Road opposite the junction of Lower Downs and Burstow Roads.

As a resident of both Burstow Road and then Dennis Park Crescent for the past 38 years I would like to express my strong objections to this plan.

The traffic problems at this junction are very extreme, especially at peak times, made even more difficult by the fact that it is not a simple junction between two roads, but complicated by an extra road at the junction - Burstow Road - with no easily understood right of way resulting in queues and gridlock.

For years it has been suggested that a roundabout would be the best solution.

Building on the spare ground by the junction would mean that the chance to improve traffic there, which will only get worse, will be lost forever.

A roundabout, not a building is the ONLY sensible course of action.
